

## List Constructors

When given two lists...

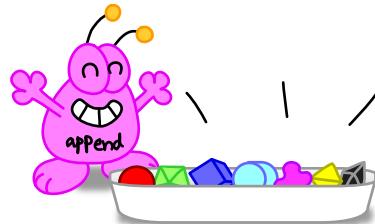

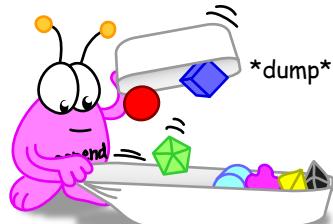

cons

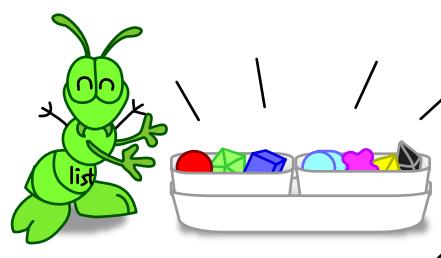

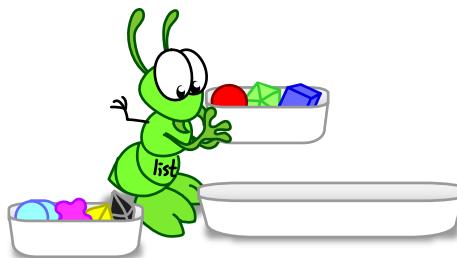

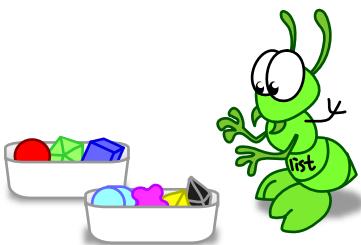

```
> (cons '(r g b) '(c m y k))  
(r g b) c m y k)
```

append

```
> (append '(r g b) '(c m y k))  
(r g b c m y k)
```

list

```
> (list '(r g b) '(c m y k))  
(r g b) (c m y k))
```

```
> (arguments 'cons)  
2  
> (arguments 'append)  
many  
> (arguments 'list)  
many
```
