Common Errors Involving Lists and Their Functions
Avoid, avoid, avoid!

Giving `append` a non-list as an argument:

```
Why isn’t anything coming out?
*shake shake*
```

Cons-ing a list to a non-list (i.e. Second argument isn’t a list):

```
(non-list first arg is ok)
```

Using list selectors on non-lists:

```
?
```

Using word and sentence selectors on lists (i.e. Data abstraction faux pas):

```
> (works? this)
#t
> '(but it is not good programming style)
> "so..."
> (do? this) #f!
```

"Crash!"

WHUNK!

*shake shake*

*wobble wobble*
